

## Land Rover Defender 90 in 1/32 scale

Started out as a MOD of set 40650, but finally became a totally different model. 7 studs wide and 1 stud longer than the mentioned set, the MOC is now in 1/32 scale and matches gauge 1 railway models. Also, it now has the distinctive "barrel side" waistline and the triple rear window, both missing on the 40650 model. The colour scheme with its black hood and roof is inspired by the 2015 "Autobiography Edition".

*Note: You will need pieces of black and red rigid hose.*
